

This is an alphabetical listing of primary topics included in Volume 46 of MP. Subject classifications are followed by issue number, then page number. An alphabetized list of authors appears on p. 87.

Aboveground storage tank

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 2 6-24

Acidity

Phlogiston and Modern Corrosion Junk
Science 3-34

Acrylic resin

Tanninsulfonic Acid-Doped Polyaniline for
Protection of Cold-Rolled Steel 2-38

Additive, non-skid

Painting at Night in the Gulf of Mexico 2-31

Admiralty brass

Creep Failure of Admiralty Brass Tubes in
an After-Cooler 1-52

After-cooler

Creep Failure of Admiralty Brass Tubes in
an After-Cooler 1-52

Agitation

Agitator Corrosion in Wet Phosphoric Acid
Production 2-51

Agitator, reactor

Agitator Corrosion in Wet Phosphoric Acid
Production 2-50

Alloy

Corrosion of UNS N06625 Nozzles in a
Biomass Fluidized Bed Boiler 9-74

Alloy, Inconel

Case Histories: Stress Corrosion Cracking
of Various Alloys—Part 2 9-71

Alloy, steel

Case Histories: Stress Corrosion Cracking
of Various Alloys—Part 2 9-69

Aluminum

Case Histories: Stress Corrosion Cracking
of Various Alloys—Part 2 9-72

Anaerobic slime

Lining Prevents Biogenic Sulfide Corrosion
In Wastewater Systems 5-36

Annealing

Sigma Phase Formation of Type 310
Stainless Steel in a Lime Kiln Burner
Nozzle 3-57

Anode

Anode Selection for Protection of
Reinforced Concrete Structures 1-26

Cathodic Protection of a Shiplock Trash
Rack at a Hydropower Station 11-30

Galvanic Corrosion Study of Tin-Silver
Solder and Copper 6-58

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 1 5-26

MMO-Coated Titanium Anodes for

Cathodic Protection—Part 2 6-24

Anode, coating

Cathodic Protection of a Shiplock Trash
Rack at a Hydropower Station 11-30

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 1 5-26

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 2 6-24

Anode, deep bed

Check Solar Weather Before Performing
Pipeline CP Evaluation 6-30

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 2 6-24

Anode, mixed metal oxide

Anode Selection for Protection of
Reinforced Concrete Structures 1-26

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 1 5-26

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 2 6-24

Anode, probe

Anode Selection for Protection of
Reinforced Concrete Structures 1-27

Anode, ribbon

Anode Selection for Protection of
Reinforced Concrete Structures 1-27

Anode, silicon iron

Anode Selection for Protection of
Reinforced Concrete Structures 1-26

Appliqués

Appliqués for Corrosion Protection in a
Tropical Environment 6-38

Asphaltic coating

Analysis of Ductile Iron Corrosion Data
from Operating Mains 2-22

Austenitic stainless steel

Chloride Stress Corrosion Cracking of UNS
S20910 Stainless Steel 1-58

Bacteria, sulfate-reducing

Detecting and Monitoring Bacteria in
Seawater Injection Systems 11-52

Effect of Biogenic Sulfide on Corrosion of
Mild Steel 6-48

SRB-Assisted MIC of Fire Sprinkler
Piping 2-46

Biogenic sulfide

Effect of Biogenic Sulfide on Corrosion of
Mild Steel 6-48

Lining Prevents Biogenic Sulfide Corrosion
in Wastewater Systems 5-36

Understanding Biogenic Sulfide
Corrosion 11-36

Brass

Case Histories: Stress Corrosion Cracking
of Various Alloys—Part 1 8-77

Brass, admiralty

Creep Failure of Admiralty Brass Tubes in
an After-Cooler 1-52

Bridge

Anode Selection for Protection of
Reinforced Concrete Structures 1-26

Brominated epoxy

Properties of a New High-Tg FBE Coating
for High-Temperature Service 4-36

Bronze

Corrosion of Old Whaling Station
Processing Equipment in Antarctica 4-57

Building, steel-framed

Anode Selection for Protection of
Reinforced Concrete Structures 1-27

Carbon fiber

Anode Selection for Protection of
Reinforced Concrete Structures 1-27

Carbon steel

A New Method for Pipeline Integrity
Management 1-42

Cast iron

Longevity of a Graphitized Cast Iron Water
Main 5-30

Cathodic disbondment

Properties of a New High-Tg FBE Coating
for High-Temperature Service 4-36

Cathodic protection

Anode Selection for Protection of
Reinforced Concrete Structures 1-26

Cathodic Protection of a Shiplock Trash
Rack at a Hydropower Station 11-30

Check Solar Weather Before Performing
Pipeline CP Evaluation 6-30

Correcting CIPS for Stray and Telluric
Current Interference 10-24

Corrosion Mitigation of USS Monitor
Artifacts 10-56

Galvanic Corrosion Study of Tin-Silver
Solder and Copper 6-58

Internal Stray Current Interference from an
External Current Source 8-40

I Told You So 3-26

Low-Alloy Steels for Reinforcing Rods in
Concrete 5-56

Mitigation Techniques for AC-DC Cathodic
Decoupling 12-30

MMO-Coated Titanium Anodes for Cathodic
Protection—Part 1 5-26

MMO-Coated Titanium Anodes for Cathodic
Protection—Part 2 6-24

This is an alphabetical listing of primary topics included in Volume 46 of MP. Subject classifications are followed by issue number, then page number. An alphabetized list of authors appears on p. 87.

Aboveground storage tank

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 2 6-24

Acidity

Phlogiston and Modern Corrosion Junk
Science 3-34

Acrylic resin

Tanninsulfonic Acid-Doped Polyaniline for
Protection of Cold-Rolled Steel 2-38

Additive, non-skid

Painting at Night in the Gulf of Mexico 2-31

Admiralty brass

Creep Failure of Admiralty Brass Tubes in
an After-Cooler 1-52

After-cooler

Creep Failure of Admiralty Brass Tubes in
an After-Cooler 1-52

Agitation

Agitator Corrosion in Wet Phosphoric Acid
Production 2-51

Agitator, reactor

Agitator Corrosion in Wet Phosphoric Acid
Production 2-50

Alloy

Corrosion of UNS N06625 Nozzles in a
Biomass Fluidized Bed Boiler 9-74

Alloy, Inconel

Case Histories: Stress Corrosion Cracking
of Various Alloys—Part 2 9-71

Alloy, steel

Case Histories: Stress Corrosion Cracking
of Various Alloys—Part 2 9-69

Aluminum

Case Histories: Stress Corrosion Cracking
of Various Alloys—Part 2 9-72

Anaerobic slime

Lining Prevents Biogenic Sulfide Corrosion
In Wastewater Systems 5-36

Annealing

Sigma Phase Formation of Type 310
Stainless Steel in a Lime Kiln Burner
Nozzle 3-57

Anode

Anode Selection for Protection of
Reinforced Concrete Structures 1-26

Cathodic Protection of a Shiplock Trash
Rack at a Hydropower Station 11-30

Galvanic Corrosion Study of Tin-Silver
Solder and Copper 6-58

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 1 5-26

MMO-Coated Titanium Anodes for

Cathodic Protection—Part 2 6-24

Anode, coating

Cathodic Protection of a Shiplock Trash
Rack at a Hydropower Station 11-30

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 1 5-26

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 2 6-24

Anode, deep bed

Check Solar Weather Before Performing
Pipeline CP Evaluation 6-30

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 2 6-24

Anode, mixed metal oxide

Anode Selection for Protection of
Reinforced Concrete Structures 1-26

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 1 5-26

MMO-Coated Titanium Anodes for
Cathodic Protection—Part 2 6-24

Anode, probe

Anode Selection for Protection of
Reinforced Concrete Structures 1-27

Anode, ribbon

Anode Selection for Protection of
Reinforced Concrete Structures 1-27

Anode, silicon iron

Anode Selection for Protection of
Reinforced Concrete Structures 1-26

Appliqués

Appliqués for Corrosion Protection in a
Tropical Environment 6-38

Asphaltic coating

Analysis of Ductile Iron Corrosion Data
from Operating Mains 2-22

Austenitic stainless steel

Chloride Stress Corrosion Cracking of UNS
S20910 Stainless Steel 1-58

Bacteria, sulfate-reducing

Detecting and Monitoring Bacteria in
Seawater Injection Systems 11-52

Effect of Biogenic Sulfide on Corrosion of
Mild Steel 6-48

SRB-Assisted MIC of Fire Sprinkler
Piping 2-46

Biogenic sulfide

Effect of Biogenic Sulfide on Corrosion of
Mild Steel 6-48

Lining Prevents Biogenic Sulfide Corrosion
in Wastewater Systems 5-36

Understanding Biogenic Sulfide
Corrosion 11-36

Brass

Case Histories: Stress Corrosion Cracking
of Various Alloys—Part 1 8-77

Brass, admiralty

Creep Failure of Admiralty Brass Tubes in
an After-Cooler 1-52

Bridge

Anode Selection for Protection of
Reinforced Concrete Structures 1-26

Brominated epoxy

Properties of a New High-Tg FBE Coating
for High-Temperature Service 4-36

Bronze

Corrosion of Old Whaling Station
Processing Equipment in Antarctica 4-57

Building, steel-framed

Anode Selection for Protection of
Reinforced Concrete Structures 1-27

Carbon fiber

Anode Selection for Protection of
Reinforced Concrete Structures 1-27

Carbon steel

A New Method for Pipeline Integrity
Management 1-42

Cast iron

Longevity of a Graphitized Cast Iron Water
Main 5-30

Cathodic disbondment

Properties of a New High-Tg FBE Coating
for High-Temperature Service 4-36

Cathodic protection

Anode Selection for Protection of
Reinforced Concrete Structures 1-26

Cathodic Protection of a Shiplock Trash
Rack at a Hydropower Station 11-30

Check Solar Weather Before Performing
Pipeline CP Evaluation 6-30

Correcting CIPS for Stray and Telluric
Current Interference 10-24

Corrosion Mitigation of USS Monitor
Artifacts 10-56

Galvanic Corrosion Study of Tin-Silver
Solder and Copper 6-58

Internal Stray Current Interference from an
External Current Source 8-40

I Told You So 3-26

Low-Alloy Steels for Reinforcing Rods in
Concrete 5-56

Mitigation Techniques for AC-DC Cathodic
Decoupling 12-30

MMO-Coated Titanium Anodes for Cathodic
Protection—Part 1 5-26

MMO-Coated Titanium Anodes for Cathodic
Protection—Part 2 6-24

Using Coupons and ER Soil Corrosion
Probes in Applying Pipeline CP
Criteria 4-26

Cathodic protection, bridge deck
Anode Selection for Protection of
Reinforced Concrete Structures 1-26

Cathodic protection, pipeline
Internal Stray Current Interference from an
External Current Source 8-40
Using Coupons and ER Soil Corrosion
Probes in Applying Pipeline CP
Criteria 4-26

Cavitation
Agitator Corrosion in Wet Phosphoric Acid
Production 2-51

Change management
A New Method for Pipeline Integrity
Management 1-44

Chloride
Corrosion in Reinforced Concrete Exposed
to Chloride-Contaminated Waters .. 3-48
Phlogiston and Modern Corrosion Junk
Science 3-32

Close interval potential surveys
Correcting CIPS for Stray and Telluric
Current Interference 10-24

Coating
Coating Assessment for Prediction of
Service Life 9-46
How VOC and HAPS Regulations Affect
Coating Applications 12-36
Managing a Coating & Plating Supply
Chain 1-36
Phlogiston and Modern Corrosion Junk
Science 3-34

Coating, application
How VOC and HAPS Regulations Affect
Coating Applications 12-36
MMO-Coated Titanium Anodes for
Cathodic Protection—Part 1 5-26

Coating, appliquéés
Appliquéés for Corrosion Protection in a
Tropical Environment 6-38

Coating, asphaltic
Analysis of Ductile Iron Corrosion Data
from Operating Mains 2-22

Coating, concrete
Lining Prevents Biogenic Sulfide Corrosion
in Wastewater Systems 5-36

Coating, conductive
Anode Selection for Protection of
Reinforced Concrete Structures 1-26

Coating, delamination
Literature Review: The Delamination of
Organic Coating 11-40

Coating, epoxy
Lining Prevents Biogenic Sulfide Corrosion
in Wastewater Systems 5-36
Painting at Night in the Gulf of Mexico 2-30
Properties of a New High-Tg FBE Coating
for High-Temperature Service 4-36

Coating, fusion-bonded epoxy
Properties of a New High-Tg FBE Coating
for High-Temperature Service 4-36

Coating, high-humidity
Painting at Night in the Gulf of Mexico 2-30

Coating, high-temperature
Properties of a New High-Tg FBE Coating
for High-Temperature Service 4-36

Coating, inspection
Managing a Coating & Plating Supply
Chain 1-36

Coating, marine or coastal
Appliquéés for Corrosion Protection in a
Tropical Environment 6-38

Coating, Monte Carlo model
Coating Assessment for Prediction of
Service Life 9-46

Coating, night application
Painting at Night in the Gulf of Mexico 2-30

Coating, offshore
Painting at Night in the Gulf of Mexico 2-30

Coating, pipeline
Properties of a New High-Tg FBE Coating
for High-Temperature Service 4-36

Coating, process
Managing a Coating & Plating Supply
Chain 1-36

Coatings, surface preparation
Soda Blasting Surface Preparation for
Maintenance Painting 8-50

Compressibility factor
A New Method for Pipeline Integrity
Management 1-42

Concrete
Estimating Long-Term Concrete Electrical
Resistivity 9-36
Performance of Concrete Bars on Industrial
Platform Substations 3-58
Three Myths About Corrosion of Steel in
Concrete 8-70

Concrete, biogenic sulfide corrosion
Understanding Biogenic Sulfide
Corrosion 11-36

Concrete, high resistivity
Estimating Long-Term Concrete Electrical
Resistivity 9-36

Concrete, prestressed
Three Myths About Corrosion of Steel in
Concrete 8-70
Using Inhibitors to Protect Steel
Prestressing in High-Performance
Grouts 3-40

Concrete, reinforced
Anode Selection for Protection of
Reinforced Concrete Structures 1-26
Corrosion in Reinforced Concrete Exposed
to Chloride-Contaminated Waters .. 3-48
Low-Alloy Steels for Reinforcing Rods in
Concrete 5-56
MMO-Coated Titanium Anodes for
Cathodic Protection—Part 2 6-24
Performance of Concrete Bars on Industrial
Platform Substations 3-58
Three Myths About Corrosion of Steel in
Concrete 8-70

Concrete, testing
Performance of Concrete Bars on Industrial
Platform Substations 3-58

Condenser
Creep Failure of Admiralty Brass Tubes in
an After-Cooler 1-52

Conductive-sprayed mortar
Anode Selection for Protection of
Reinforced Concrete Structures 1-27

Contamination, lead
Lead Contamination of Condensed
Water 4-46

Copper
Failure Analysis: Microbiologically
Influenced Corrosion in a Copper Tube
Chiller 11-48

Copper tubular components
Galvanic Corrosion Study of Tin-Silver
Solder and Copper 6-58

Corrosion, biogenic sulfide
Effect of Biogenic Sulfide on Corrosion of
Mild Steel 6-48
Lining Prevents Biogenic Sulfide Corrosion
in Wastewater Systems 5-36
Understanding Biogenic Sulfide
Corrosion 11-36

Corrosion control system
I Told You So 3-26

Corrosion, engineering

- Offshore Assets: From Corrosion Engineering to Corrosion Management 10-35
- Failure Analysis, Part 1—Theory and Engineering 12-54

Corrosion fatigue

- Agitator Corrosion in Wet Phosphoric Acid Production 2-51

Corrosion inhibitor

- Literature Review: The Delamination of Organic Coating 11-40
- Standards for Laboratory Evaluation of Oilfield Corrosion Inhibitors 5-46
- Using Inhibitors to Protect Steel Prestressing in High-Performance Grouts 3-40

Corrosion inhibitor, pipeline

- Standards for Laboratory Evaluation of Oilfield Corrosion Inhibitors 5-46

Corrosion inhibitor, standards

- Standards for Laboratory Evaluation of Oilfield Corrosion Inhibitors 5-46

Corrosion, external

- Analysis of Ductile Iron Corrosion Data from Operating Mains 2-22

Corrosion, formicary

- Formicary Corrosion of Cupronickel Tubing 4-52

Corrosion, galvanic

- Galvanic Corrosion Study of Tin-Silver Solder and Copper 6-58

Corrosion, internal

- A New Method for Pipeline Integrity Management 1-42

Corrosion, management

- A New Method for Pipeline Integrity Management 1-44
- Offshore Assets: From Corrosion Engineering to Corrosion Management 10-36

Corrosion, measurement

- Corrosion Measurements in an Historic Building 11-60

Corrosion, microbiologically influenced

- Case History: Tuberculation Corrosion in Industrial Effluents 9-54
- Detecting and Monitoring Bacteria in Seawater Injection Systems 11-52
- Failure Analysis: Microbiologically Influenced Corrosion in a Copper Tube Chiller 11-48

Lead Contamination of Condensed

- Water 4-46
- SRB-Assisted MIC of Fire Sprinkler Piping 2-46

Corrosion, pitting

- A New Method for Pipeline Integrity Management 1-43
- Chloride Stress Corrosion Cracking of UNS S20910 Stainless Steel 1-58
- Empirical Equations to Predict Conditions for Solid Deposition 8-58
- SRB-Assisted MIC of Fire Sprinkler Piping 2-47

Corrosion, stress corrosion cracking

- Agitator Corrosion in Wet Phosphoric Acid Production 2-51
- Case Histories: Stress Corrosion Cracking of Various Alloys—Part 1 8-74
- Case Histories: Stress Corrosion Cracking of Various Alloys—Part 2 9-67
- Chloride Stress Corrosion Cracking of UNS S20910 Stainless Steel 1-58
- Creep Failure of Admiralty Brass Tubes in an After-Cooler 1-52

Corrosion, sulfide

- Effect of Biogenic Sulfide on Corrosion of Mild Steel 6-48
- Lining Prevents Biogenic Sulfide Corrosion in Wastewater Systems 5-36
- Understanding Biogenic Sulfide Corrosion 11-36

Corrosion, tuberculation

- Case History: Tuberculation Corrosion in Industrial Effluents 9-54

Corrosion, underdeposit

- Empirical Equations to Predict Conditions for Solid Deposition 8-58

Coupon

- Using Coupons and ER Soil Corrosion Probes in Applying Pipeline CP Criteria 4-26

Creep, elevated temperature

- Creep Failure of Admiralty Brass Tubes in an After-Cooler 1-53

Cupronickel

- Formicary Corrosion of Cupronickel Tubing 4-52

Current, telluric

- Check Solar Weather Before Performing Pipeline CP Evaluation 6-30
- Correcting CIPS for Stray and Telluric Current Interference 10-24

Cyclic acid regeneration

- Phlogiston and Modern Corrosion Junk Science 3-32

Delamination

- Literature Review: The Delamination of Organic Coating 11-40

Ductile iron

- Analysis of Ductile Iron Corrosion Data from Operating Mains 2-22
- Case Histories: Stress Corrosion Cracking of Various Alloys—Part 2 9-67

Ductility

- Sigma Phase Formation of Type 310 Stainless Steel in a Lime Kiln Burner Nozzle 3-54

Electrical Resistivity

- Estimating Long-Term Concrete Electrical Resistivity 9-36

Electroactive conducting polymers

- Literature Review: The Delamination of Organic Coating 11-40

Electrocatalytic coating

- MMO-Coated Titanium Anodes for Cathodic Protection—Part 1 5-27
- MMO-Coated Titanium Anodes for Cathodic Protection—Part 2 6-24

Electrodes, mixed metal oxide

- MMO-Coated Titanium Anodes for Cathodic Protection—Part 1 5-26
- MMO-Coated Titanium Anodes for Cathodic Protection—Part 2 6-24

Encasement, polyethylene

- Analysis of Ductile Iron Corrosion Data from Operating Mains 2-22

Epoxy

- Lining Prevents Biogenic Sulfide Corrosion in Wastewater Systems 5-36
- Painting at Night in the Gulf of Mexico 2-30
- Properties of a New High-Tg FBE Coating for High-Temperature Service 4-36

Epoxy, brominated

- Properties of a New High-Tg FBE Coating for High-Temperature Service 4-36

Epoxy, fusion-bonded

- Properties of a New High-Tg FBE Coating for High-Temperature Service 4-36

Epoxy, high-temperature

- Properties of a New High-Tg FBE Coating for High-Temperature Service 4-36

Epoxy, weathering

- Properties of a New High-Tg FBE Coating for High-Temperature Service 4-36

Erosion

Agitator Corrosion in Wet Phosphoric Acid Production..... 2-51

Erosion-corrosion

Agitator Corrosion in Wet Phosphoric Acid Production..... 2-51

External corrosion

Analysis of Ductile Iron Corrosion Data from Operating Mains..... 2-22

Failure analysis

Chloride Stress Corrosion Cracking of UNS S20910 Stainless Steel..... 1-58

Creep Failure of Admiralty Brass Tubes in an After-Cooler..... 1-52

Failure, prediction

A New Method for Pipeline Integrity Management..... 1-43

Feature Articles (Various Subjects)

A Closer Look at Long-Term Nuclear Waste Disposal..... 9-28

Corrosion at Prudhoe Bay—A Lesson on the Line..... 8-26

Galvanic Corrosion Threatens Historic Lighthouse..... 10-20

New Training Facility Takes Root..... 5-24

Red Cliff Arch Bridge: Spanning the Gap Between Historic Construction and Modern Technology..... 9-32

University of Akron and Partners Lay Groundwork for New Degree Program..... 4-24

Wanted: Corrosion Professionals..... 12-26

Fire sprinkler

SRB-Assisted MIC of Fire Sprinkler Piping..... 2-46

Fluid velocity

Corrosion of Low-Velocity, High Water Cut Oil Emulsion Pipelines..... 8-64

Fluidized bed

Corrosion of UNS N06625 Nozzles in a Biomass Fluidized Bed Boiler..... 9-74

Formicary corrosion

Formicary Corrosion of Cupronickel Tubing..... 4-52

Freeze-thaw damage

Anode Selection for Protection of Reinforced Concrete Structures..... 1-26

Fusion-bonded epoxy

Properties of a New High-Tg FBE Coating for High-Temperature Service..... 4-36

Fusion-bonded epoxy, high-temperature

Properties of a New High-Tg FBE Coating for High-Temperature Service..... 4-36

Fusion-bonded epoxy, weathering

Properties of a New High-Tg FBE Coating for High-Temperature Service..... 4-36

Galvanic corrosion

Galvanic Corrosion Study of Tin-Silver Solder and Copper..... 6-58

Galvanized piping

SRB-Assisted MIC of Fire Sprinkler Piping..... 2-46

Gas, sour

A New Method for Pipeline Integrity Management..... 1-42

Gas, sweet

A New Method for Pipeline Integrity Management..... 1-42

Gasket selection

Gasket Selection for Stainless Steels in Seawater..... 10-50

Grain growth

Sigma Phase Formation of Type 310 Stainless Steel in a Lime Kiln Burner Nozzle..... 3-56

Graphite

Anode Selection for Protection of Reinforced Concrete Structures..... 1-27

Graphitization

Longevity of a Graphitized Cast Iron Water Main..... 5-30

Grout

Using Inhibitors to Protect Steel Prestressing in High-Performance Grouts..... 3-40

Heat exchanger

Creep Failure of Admiralty Brass Tubes in an After-Cooler..... 1-52

Failure Analysis: Erosion-Corrosion Failure of a Spiral Heat Exchanger..... 12-50

High-temperature coating

Properties of a New High-Tg FBE Coating for High-Temperature Service..... 4-36

High-temperature creep damage

Sigma Phase Formation of Type 310 Stainless Steel in a Lime Kiln Burner Nozzle..... 3-54

Historic

Corrosion Measurements in an Historic Building..... 11-60

Corrosion Mitigation of USS Monitor Artifacts..... 10-56

Hydrogen sulfide

A New Method for Pipeline Integrity Management..... 1-42

Lining Prevents Biogenic Sulfide Corrosion in Wastewater Systems..... 5-36

Impingement

Agitator Corrosion in Wet Phosphoric Acid Production..... 2-51

Inconel alloy

Case Histories: Stress Corrosion Cracking of Various Alloys—Part 2..... 9-71

Industrial Computerized Tomography

Failure Analysis: Using Industrial Computerized Tomography for Corrosion Investigation..... 12-60

Inhibitor, corrosion

Literature Review: The Delamination of Organic Coating..... 11-40

Standards for Laboratory Evaluation of Oilfield Corrosion Inhibitors..... 5-46

Integrity management system

Offshore Assets—From Corrosion Engineering to Corrosion Management..... 10-34

Integrity, pipeline

A New Method for Pipeline Integrity Management..... 1-42

Internal corrosion

A New Method for Pipeline Integrity Management..... 1-42

Internal corrosion direct assessment

A New Method for Pipeline Integrity Management..... 1-42

Internal stray current

Internal Stray Current Interference from an External Current Source..... 8-40

Ion migration

Phlogiston and Modern Corrosion Junk Science..... 3-34

2007 MP Index

Iron

- Analysis of Ductile Iron Corrosion Data from Operating Mains 2-22
- Case Histories: Stress Corrosion Cracking of Various Alloys—Part 2 9-67
- Corrosion Measurements in an Historic Building 11-60
- Corrosion Mitigation of USS Monitor Artifacts 10-56
- Longevity of a Graphitized Cast Iron Water Main 5-30
- Phlogiston and Modern Corrosion Junk Science 3-32

Iron, cast

- Longevity of a Graphitized Cast Iron Water Main 5-30

Iron, ductile

- Analysis of Ductile Iron Corrosion Data from Operating Mains 2-22
- Case Histories: Stress Corrosion Cracking of Various Alloys—Part 2 9-67

Kiln, lime

- Sigma Phase Formation of Type 310 Stainless Steel in a Lime Kiln Burner Nozzle 3-54

Lavoisier

- Phlogiston and Modern Corrosion Junk Science 3-32

Lead, in water

- Lead Contamination of Condensed Water 4-46

Lead wire insulation

- MMO-Coated Titanium Anodes for Cathodic Protection—Part 1 5-28

Legionella

- SRB-Assisted MIC of Fire Sprinkler Piping 2-48

Lime kiln

- Sigma Phase Formation of Type 310 Stainless Steel in a Lime Kiln Burner Nozzle 3-54

Lining

- Lining Prevents Biogenic Sulfide Corrosion in Wastewater Systems 5-36

Maintenance, pipeline

- A New Method for Pipeline Integrity Management 1-42

Management, integrity

- Offshore Assets: From Corrosion Engineering to Corrosion Management 10-31

Management of change

- A New Method for Pipeline Integrity Management 1-44

Management, pipeline integrity

- A New Method for Pipeline Integrity Management 1-42

Marine structure, jetty

- Anode Selection for Protection of Reinforced Concrete Structures 1-27

Microbiologically influenced corrosion

- Case History: Tuberculation Corrosion in Industrial Effluents 9-54
- Detecting and Monitoring Bacteria in Seawater Injection Systems 11-52
- Failure Analysis: Microbiologically Influenced Corrosion in a Copper Tube Chiller 11-48
- Lead Contamination of Condensed Water 4-46
- SRB-Assisted MIC of Fire Sprinkler Piping 2-46

Mild steel corrosion

- Effect of Biogenic Sulfide on Corrosion of Mild Steel 6-48

Mitigation

- A New Method for Pipeline Integrity Management 1-42

Mixed metal oxide-coated

- MMO-Coated Titanium Anodes for Cathodic Protection—Part 1 5-26
- MMO-Coated Titanium Anodes for Cathodic Protection—Part 2 6-24

Modeling, pipeline integrity

- A New Method for Pipeline Integrity Management 1-42

Monitoring, pipeline integrity

- A New Method for Pipeline Integrity Management 1-42

Mortar, conductive sprayed

- Anode Selection for Protection of Reinforced Concrete Structures 1-27

Offshore

- Offshore Assets: From Corrosion Engineering to Corrosion Management 10-34
- Painting at Night in the Gulf of Mexico 2-30

Oilfield

- Standards for Laboratory Evaluation of Oilfield Corrosion Inhibitors 5-46

Oil industry

- Effect of Biogenic Sulfide on Corrosion of Mild Steel 6-48
- Empirical Equations to Predict Conditions for Solid Deposition 8-58

Oxidation

- MMO-Coated Titanium Anodes for Cathodic Protection—Part 1 5-26
- MMO-Coated Titanium Anodes for Cathodic Protection—Part 2 6-24

Paper industry

- Sigma Phase Formation of Type 310 Stainless Steel in a Lime Kiln Burner Nozzle 3-54

Phosphoric acid

- Agitator Corrosion in Wet Phosphoric Acid Production 2-50

Phreatic mantle

- Corrosion in Reinforced Concrete Exposed to Chloride-Contaminated Waters .. 3-48

Pipeline

- A Systematic Approach to Prevent Internal Corrosion of Pipelines 12-44
- Pipeline Ultrasonic Intelligent Inspection Device and Assessment Software .. 9-62

Pipeline, cathodic protection

- Internal Stray Current Interference from an External Current Source 8-40
- Using Coupons and ER Soil Corrosion Probes in Applying Pipeline CP Criteria 4-26

Pipeline, coating

- Properties of a New High-Tg FBE Coating for High-Temperature Service 4-36

Pipeline corrosion inhibitor

- Calcium Carbonate Precipitation in the Presence of Inhibitors 10-42
- Standards for Laboratory Evaluation of Oilfield Corrosion Inhibitors 5-46

Pipeline integrity

- A New Method for Pipeline Integrity Management 1-42

Pipeline, interior corrosion

- Internal Stray Current Interference from an External Current Source 8-40

Pipeline, internal corrosion

- A New Method for Pipeline Integrity Management 1-42
- A Systematic Approach to Prevent Internal Corrosion of Pipelines 12-44
- Calcium Carbonate Precipitation in the Presence of Inhibitors 10-42

- Corrosion of Low-Velocity, High Water Cut Oil Emulsion Pipelines** 8-64
- Pipeline, natural gas**
Check Solar Weather Before Performing Pipeline CP Evaluation 6-30
Pipeline Ultrasonic Intelligent Inspection Device and Assessment Software .. 9-62
- Pipeline, solid deposition**
Empirical Equations to Predict Conditions for Solid Deposition 8-58
- Pipeline, tuberculation**
Case History: Tuberculation Corrosion in Industrial Effluents 9-54
- Pipeline, ultrasonic inspection**
Pipeline Ultrasonic Intelligent Inspection Device and Assessment Software .. 9-62
- Piping, galvanized**
SRB-Assisted MIC of Fire Sprinkler Piping 2-46
- Pitting**
A New Method for Pipeline Integrity Management 1-43

2007 MP Index

Steel, frame

- Anode Selection for Protection of Reinforced Concrete Structures 1-27

Steel, in concrete

- Low-Alloy Steels for Reinforcing Rods in Concrete 5-56
Three Myths About Corrosion of Steel in Concrete 8-70
Using Inhibitors to Protect Steel Prestressing in High-Performance Grouts 3-40

Steel, low alloy

- Low-Alloy Steels for Reinforcing Rods in Concrete 5-56

Steel, plate

- Tanninsulfonic Acid-Doped Polyaniline for Protection of Cold-Rolled Steel 2-38

Steel, stainless

- Case Histories: Stress Corrosion Cracking of Various Alloys—Part 1 8-74
Chloride Stress Corrosion Cracking of UNS S20910 Stainless Steel 1-58
Corrosion of UNS N06625 Nozzles in a Biomass Fluidized Bed Boiler 9-74
Gasket Selection for Stainless Steels in Seawater 10-50
Sigma Phase Formation of Type 310 Stainless Steel in a Lime Kiln Burner Nozzle 3-54

Stray current

- Correcting CIPS for Stray and Telluric Current Interference 10-24
Estimating Long-Term Concrete Electrical Resistivity 9-36
Internal Stray Current Interference from an External Current Source 8-40

Stress corrosion cracking

- Agitator Corrosion in Wet Phosphoric Acid Production 2-51
Case Histories: Stress Corrosion Cracking of Various Alloys—Part 1 8-74
Case Histories: Stress Corrosion Cracking of Various Alloys—Part 2 9-67
Chloride Stress Corrosion Cracking of UNS S20910 Stainless Steel 1-58
Creep Failure of Admiralty Brass Tubes in an After-Cooler 1-52

Sulfate-reducing bacteria

- Detecting and Monitoring Bacteria in Seawater Injection Systems 11-52
Effect of Biogenic Sulfide on Corrosion of Mild Steel 6-48
SRB-Assisted MIC of Fire Sprinkler Piping 2-46

Sulfide corrosion

- Effect of Biogenic Sulfide on Corrosion of Mild Steel 6-48
Lining Prevents Biogenic Sulfide Corrosion in Wastewater Systems 5-36
Understanding Biogenic Sulfide Corrosion 11-36

Sulfonic acid

- Tanninsulfonic Acid-Doped Polyaniline for Protection of Cold-Rolled Steel 2-38

Supply chain

- Managing a Coating & Plating Supply Chain 1-36

Surface Preparation

- Soda Blasting Surface Preparation for Maintenance Painting 8-50

Sweet gas

- A New Method for Pipeline Integrity Management 1-42

Tanninsulfonic acid

- Tanninsulfonic Acid-Doped Polyaniline for Protection of Cold-Rolled Steel 2-38

TANI-PANI

- Tanninsulfonic Acid-Doped Polyaniline for Protection of Cold-Rolled Steel 2-38

Tank bottom

- MMO-Coated Titanium Anodes for Cathodic Protection—Part 2 6-25

Telluric current interference

- Correcting CIPS for Stray and Telluric Current Interference 10-24

Thermal-sprayed zinc

- Anode Selection for Protection of Reinforced Concrete Structures 1-27

Tin-silver (SnAg) solder

- Galvanic Corrosion Study of Tin-Silver Solder and Copper 6-58

Titanium

- MMO-Coated Titanium Anodes for Cathodic Protection—Part 1 5-26
MMO-Coated Titanium Anodes for Cathodic Protection—Part 2 6-24

Tube failure

- Creep Failure of Admiralty Brass Tubes in an After-Cooler 1-52
Failure Analysis: Microbiologically Influenced Corrosion in a Copper Tube Chiller 11-48

Tuberculation

- Case History: Tuberculation Corrosion in Industrial Effluents 9-54

Tubular electrodes

- MMO-Coated Titanium Anodes for Cathodic Protection—Part 2 6-24

Turbulence

- Agitator Corrosion in Wet Phosphoric Acid Production 2-51

UNS N06625

- Corrosion of UNS N06625 Nozzles in a Biomass Fluidized Bed Boiler 9-74

Van der Waal

- A New Method for Pipeline Integrity Management 1-42

Waste water

- Analysis of Ductile Iron Corrosion Data from Operating Mains 2-22
Case History: Tuberculation Corrosion in Industrial Effluents 9-54
Lining Prevents Biogenic Sulfide Corrosion in Wastewater Systems 5-36
Understanding Biogenic Sulfide Corrosion 11-36

Water

- Analysis of Ductile Iron Corrosion Data from Operating Mains 2-22
Calcium Carbonate Precipitation in the Presence of Inhibitors 10-42
Cathodic Protection of a Shiplock Trash Rack at a Hydropower Station 11-30
Lead Contamination of Condensed Water 4-46

Water cooling

- Creep Failure of Admiralty Brass Tubes in an After-Cooler 1-52

Water-jetting

- Painting at Night in the Gulf of Mexico 2-31

Water utility

- Estimating Long-Term Concrete Electrical Resistivity 9-36
I Told You So 3-26

Welding

- Sigma Phase Formation of Type 310 Stainless Steel in a Lime Kiln Burner Nozzle 3-56

Well casings

- MMO-Coated Titanium Anodes for Cathodic Protection—Part 2 6-24

Zinc, thermal-sprayed

- Anode Selection for Protection of Reinforced Concrete Structures 1-27
